

Tablet

DE FOL

**Iron + L-methylfolate + Vitamin B6
Vitamin B12 & Vitamin C**

Every Drop Counts

This product is registered
Enlistment No. 002.0024

DE FOL

**Iron + L-methylfolate + Vitamin B6
Vitamin B12 & Vitamin C**

Iron Bisglycinate

In the prevention of ID and IDA, Iron bisglycinate is not inferior to ferrous sulfate. Iron bisglycinate in a low dose of 27 mg iron/day appears to be adequate to prevent IDA.

The many unique attributes of **Ferrochel** (ferrous bisglycinate chelate) support its superior role as an iron supplement in humans.

Does not interact with other nutrients,
Increases tolerability and absorption
Safer than typical iron salts
Supports overall health
Vegeterian friendly

Ferrochel has:
the GRAS certificate (Generally Recognized as Safe) awarded by the FDA.
The positive opinion of EFSA (European Food Safety Authority)

L-methylfolate

L-methylfolate is structurally analogue to the reduced and active form of folic acid 5-methyltetrahydrofolate (L-methylfolate), is absorbed directly in the active form that can immediately diffuse into the blood and is available for its immediate biological action.

It is needed to form healthy cells, especially red blood cells, Folic acid supplements may come in different forms (such as L-methylfolate, levomefolate, methyltetrahydrofolate). They are used to treat or prevent low folate levels. Low folate levels can lead to certain type of anemia.

Vitamin B6

Vitamin B6, play an important role in a range of physical and psychological functions. They are most known for helping to maintain a healthy metabolism, nerve function, liver function, skin health, eye health, as well as helps to boost levels of energy.

Vitamin B12

Vitamin B12 deficiency anemia is one of several types of megaloblastic anemia. It is characterized by very large red blood cells with inner contents that are not completely developed. Symptoms include weak muscles, numbness, difficulty walking, nausea, weight loss, irritability, fatigue and increased heart rate.

Vitamin C

Vitamin C plays a number of important roles in the body, including enhancing the absorption of iron. Iron helps make hemoglobin, the part of the red blood cell that carries oxygen. Vitamin C also aid in red blood cell production. A vitamin C deficiency can lead to anemia, or low red blood cell count.

Composition:

Each tablet contains:
Iron Bisglycinate (Elemental Iron 26mg) (MS).....130mg
L-methylfolate (MS).....400mg
Vitamin B6 (as Pyridoxin HCL) (USP).....5mg
Vitamin B 12 (USP).....400mcg
Vitamin C (USP).....50mg

Dosage: 1 to 2 tablets daily or as advised by physician
