Phyllanthus emblica

It nourishes tissues and accelerates the cell regeneration process. It helps scavenge free radicals linked to premature aging. It helps in building the body's immune system and provides resistance against many diseases, especially those of the respiratory tract.

Archilea millefolium

As an anti-hemorrhoid, Yarrow stops internal and external bleeding. The herb is also helpful in treating gastrointestinal disorders like dyspepsia and spastic pain in the stomach.

Elettaria cardamomum

- Cardamom is used in treating digestive disorders, relieving heartburn and bloating.
- Apart from preventing tooth and gum infections, the herb is used to eliminate bad breath.
- Cardamom is a diuretic and flushes out accumulated toxins from the body.

Tinspora cordifolia

- It helps increase the effectiveness of the protective white blood cells and build up the body's own defence mechanism.
- It helps to remove urinary stores and assist in the management of urinary disorders including UTIs.
- It is helpful in treating liver damage.

Tribulus terrestris

- The extract of this herb are useful in treating low libido and erectile dysfunction.
- The herb is also used to treat kidney dysfunction, urinary disorders and disease of the genito-urinary system.

Terrestrialia chebula

- Chebulic myrobalan is used to treat flatulence, dysentery, diarrhea and constipation.
- Respiratory disorders such as cough and bronchial asthma are relieved by the herb.

Cichorium intybus

- The herb is helpful in treating an enlarged liver and protects against alcohol-induced hepatic damage.
- Due to the presence of compounds that are central nervous system stimulants, Chicory is used to treat nervous disorders such as anxiety. The herb is known to lower blood sugar levels.

Tamarix gallica

As a laxative tamarisk is beneficial in the treatment of constipation. It is also useful in bleeding disorders like menorrhagia and rectal bleeding.

Piper longum

- As an antihypertensive and sedative, Indian Long Pepper is beneficial in treating insomnia.
- It is useful in the treatment of respiratory disorders like the common cough, bronchitis and asthma.
- It is also a potent digestive, which helps in treating gastrointestinal disorders like indigestion.
