How is Methyco-Sub™ different?

It's about absorption

In many people with low B12 levels, vitamin B12 supplements aren't enough if a doctor recommends other B12 therapies, it could be because digestive system is not absorbing B12 very well through the diet or oral supplements.

That's Where Methyco-sub is Different

Methyco-Sub has a "Special route" that makes sure your body gets the B12 it needs by taking a pill Just Once a day - without the need for any accompanying injection. It is called "Sublingual route" When a patient takes sublingual tablet.

Sublingual Methyco-Sub won't require a medical supervision to help you out

- ✓ Sublingual Methyco-Sub is foa cheaper then B12 injection or interavenous administration.
- ✓ Sublingual Methyco-Sub is perfect for people who either can't or don't like to swallowing tablet.
- ✓ Similar or low in price to oral tablet.
